Frank Platt, an Enterprise Security Architect and Cyber-Defense Strategist, has provided cyber security consulting and education services across the U.S. and around the globe for over 40 years. His independent consultant agency, InfoSec Alliance, has provided industry leaders with a more thorough understanding of cyber-risk and guidance towards the mitigation of risk to their respective organizations and key stakeholders through the loss of confidentiality, availability of data assets, and ultimately perceived integrity.

Frank's career in technology management began with AT&T. During his tenure with AT&T, he identified a market need for independent third party consultants capable of representing a client's technological requirements without bias towards any one service provider, hardware vendor, or software vendor.

InfoSec Alliance clients include industry leaders and fortune 100 companies around the world, including: FedEx, NFL and NASCAR, HCA and Ardent, United Technologies, Carrier Corporation, and Electrolux, Synovus and Avaloq Sourcing Asia Pacific, and many more organizations in the fields of logistics, sports entertainment, healthcare, finance and insurance, smart-manufacturing, energy, transportation, K12 and higher education.

Frank attended University of Memphis, is a graduate of the Kauffman Foundation Entrepreneurial Center, and is in good standing with the International Information Systems Security Certification Consortium, Inc. (ISC2) as a Certified Information Systems Security Professional CISSP (107408). He currently maintains a position on the Board for Agrin Health, ServicesDot, and InfraGard, and has served on the Boards of Information Systems Audit and Control Association (ISACA), Information Systems Security Association (ISSA), and Association of Continuity Professionals (ACP).
